

# **WEEK 1**

## **Aim**

To create an ATS-friendly resume webpage using basic HTML elements.

## **Description:**

This experiment demonstrates the creation of a structured resume using basic HTML. The webpage includes personal details, contact information, career objective, educational qualifications, technical skills, work experience, projects, certifications, strengths, languages known, and declaration. HTML elements such as headings, paragraphs, lists, tables, images, and horizontal lines are used to organize the resume.

## Details About Program:

Saved in: Week 1 folder of the repository.

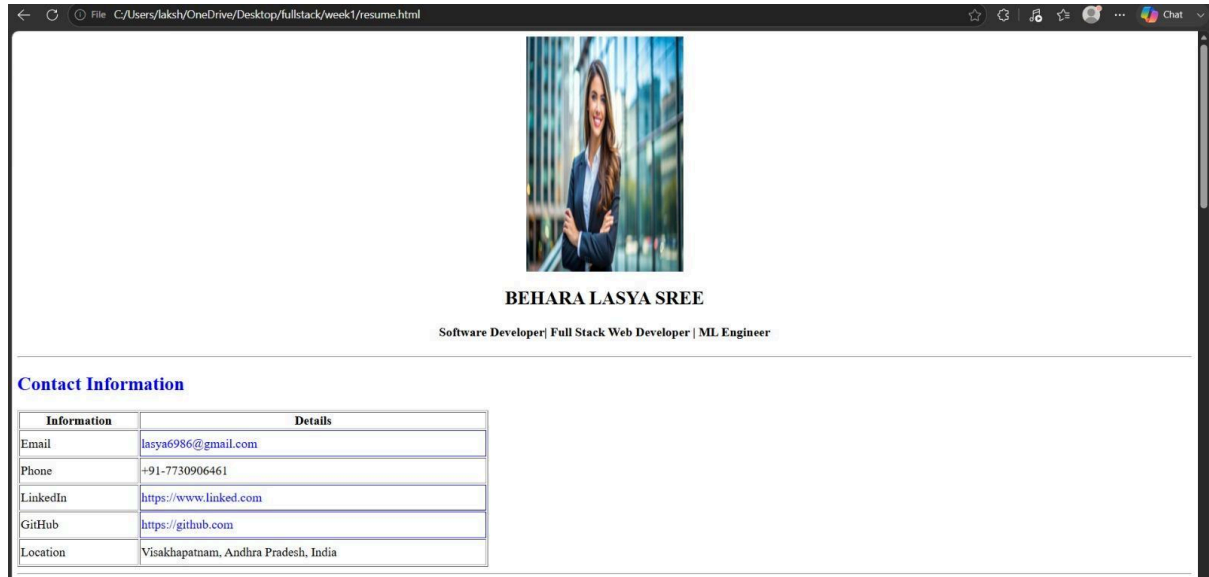

File used: HTML file with an image stored in the images folder.

Technology used: HTML.

Execution: The HTML file is opened in a web browser.

Working: Basic HTML elements are used to create and organize different sections of the resume. Tables are used for contact, education, and project details, while lists are used for skills, experience, certifications, strengths, and languages.

## Output:

## Career Objective

Aspiring to leverage my full-stack development and machine learning skills to create scalable, intelligent applications while contributing to innovative projects in a dynamic tech environment.

## Educational Qualification
